ProSeries
ABOVE-GROUND
HIGH RATE SAND FILTERS

The Clear Choice In Sand Filtration.

- Exclusive full-flow 360° self-cleaning laterals provide energy-efficient operation and thorough backwashing
- Seven-position VariFlo™ control valve makes changing filter function quick and easy
- Corrosion-proof construction
- Reduced energy costs
- Easy-access assembly makes service simple
- For above ground or small in-ground pools

**Why you should go with the Pro.**

Superior filtration from the inside out.

The ProSeries filter features an integral top diffuser that evenly distributes unfiltered water over the sand media bed in a cascading, umbrella-like pattern. This allows the greatest filtration possible from every square inch of sand.

Then the self-cleaning underdrain assembly, with its 360° slotted laterals, provides a fast, balanced flow of clear water back to the pool while allowing for more thorough backwashing. Best of all, the ProSeries’ full-flow technology reduces your energy costs because the filter operates for shorter periods.

Seventh-position valve puts you in control.

The patented, multiposition control valve developed by Hayward was designed with seven pool filter positions. An easy-to-use lever-action handle lets you quickly dial any function.

Long-lasting convenience.

You can easily access the ProSeries filter assembly for simple servicing via the unique folding ball joint in the laterals. A corrosion-proof housing protects the filter from severe weather for years to come.

---

**ProSeries Specifications**

- **Filter type:** High-rate sand: No. 20 silica sand (.45 mm – .55 mm)
- **Filter tank:** Molded polymeric
- **Underdrain:** 360° self-cleaning slotted laterals, precision installed in ball-joint assembly
- **Control valve:** Seven-position, top-mount VariFlo™ valve with lever-action handle
- **Valve fastening:** Flange clamp design
- **Pump and motor:** PowerFlo LX™ or PowerFlo Matrix® Series Pump – 115 volts
- **Mounting base:** Injection-molded thermoplastic
