Spa Heaters
CSPA SERIES HEATERS

Hayward spa heaters contain all of the sophisticated features and capabilities of heaters twice their size. The electronic heaters fit into compact spaces – even under spa skirts or steps. Like all Hayward heaters, they are easy to install and service.
CSPAXI Electronic Spa Heater

Features

- 304 stainless steel tank
- 304 stainless steel threaded head, electronic heating element
- Heater on indicator light
- UPS shippable

Spa Sizing

Determine your spa capacity in gallons (surface area x average depth x 7 ½)
The reference table lists the time required in minutes to raise the temperature of the spa/hot tub by 30°F
This guide can be adjusted for other temperature rises. For example, if you desire a 15°F increase in temperature, simply divide the time for 30°F rise by the ratio of \(\frac{30}{15} = 2\).
Spa sizing is based on an insulated and covered spa. Always cover your spa or hot tub when not in use to minimize the heat loss and evaporation.

Example

Increase the temperature of a 300 gallon spa to go from 70°F to 100°F in 120 minutes.

\[
\begin{align*}
\text{100°F} & \quad \text{subtract} \quad \text{70°F} \\
& \quad \text{30°F Requested Temperature Rise}
\end{align*}
\]
